Summary

Software developer with experience in building scalable, production-grade applications and delivering real-world solutions. Skilled in backend systems, data-driven applications, and LLM-based analytics, with a strong focus on performance, reliability, and clean architecture. Proven ability to deliver end-to-end solutions used by real clients and recognized in competitive hackathons.

Key Highlights

- Built and deployed 2+ production-grade applications used by real clients
- Achieved top rankings in multiple hackathons including IIT Bombay

Education

Pune Institute of Computer Technology (PICT) <i>B.Tech in Electronics and Computer Engineering</i>	Aug 2025 – Present <i>CGPA: 9.32</i>
Bharati Vidyapeeth's J.N.I.O.T. - Katraj, Pune <i>Diploma in Computer Technology</i>	May 2022 – May 2025 <i>93.26%</i>
St. Vincent High School - Camp, Pune <i>Secondary and High School (SSC)</i>	July 2015 – May 2022 <i>10th: 87%</i>

Experience

Word Lane Tech <i>Backend Developer & Client Coordination Intern</i>	July 2025 – Dec 2025 <i>Pune</i>
• Developed backend modules for client projects, improving system reliability and reducing manual workflows. • Delivered 4 projects end-to-end, optimizing development cycles and ensuring timely deployment. • Collaborated with clients and cross-functional teams to streamline communication and accelerate delivery timelines.	

Projects

QueryPilot <i>Python, LLM APIs, SQL, Data Analytics</i>	Jan 2026 – Feb 2026
• Developed an LLM-powered analytics platform to process UPI transaction datasets and generate actionable, context-aware business insights. • Processed 2,50,000+ transactions to analyze spending patterns, revenue trends, and customer behavior. • Secured 2nd place at IIT Bombay (InsightX) for innovation and real-world impact.	
TradersDesk <i>Java, Swing, Android, Maven, SQLite, PostgreSQL (Supabase), HTTP APIs</i>	Mar 2026 – Present
• Engineered a production-grade desktop platform using Java Swing, along with a fully functional Android mobile application, enabling saree brokers to manage billing workflows, payments, commissions, and returns seamlessly. • Processed 5000+ monthly transactions across 2 clients with robust data handling using SQLite for offline storage and PostgreSQL (Supabase) for scalable cloud persistence. • Designed and implemented secure HTTP-based APIs for real-time data synchronization between desktop and mobile apps, and packaged the desktop application into a distributable EXE for deployment.	

- Developed an event management platform automating certificate generation, bulk email communication, and participant management.
- Automated workflows for 300+ participants with QR-based validation, reducing manual effort by 80%.
- Deployed at Bharati Vidyapeeth's COEP; recognized as a hackathon-winning best end-to-end product.

- Built an end-to-end startup operating platform integrating modules for idea validation, roadmap planning, task tracking, and team communication.
- Implemented centralized dashboards and execution pipelines to enhance productivity, collaboration, and progress tracking across startup workflows.

Technical Skills

- **Languages:** Java, Python, C/C++, SQL, JavaScript
- **Frameworks & Libraries:** JavaFX, Swing, React, Node.js, Express.js, LLM APIs
- **Databases:** SQLite, PostgreSQL (Supabase), MongoDB
- **Tools & Platforms:** Git (GitHub), Maven, VS Code
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Data Modeling
- **Additional:** JDBC, API Integration (HTTP), System Design Basics, JAR/EXE Packaging

Achievements

- Runner-Up – InsightX, IIT Bombay (Team Leader, 1700+ teams)
- Winner – TechSprint'26 Hackathon (Team Leader, 200+ teams)
- Finalist – GDG Cloud Pune Hackathon (1000+ teams)
- Finalist – Meta x OpenEnv x PyTorch Hackathon, Bangalore (Team Leader, 52,000+ teams)
- Runner-Up – Indradhanu'25 Project Competition (150+ projects)
